

## OG-315-E

### 315W CMH Lamp Economy Open Reflector High Performance Grow Light

The OG-315 was designed specifically for 315W CMH lamps. The design and performance of this reflector puts it in a class all by itself.

The specular reflector with micro-bends efficiently focuses all available light produced by the lamp down to the plant canopy. No other horticulture fixture offers this micro-bend design. This one-of-a-kind reflector doubles the intensity of competitive products resulting in faster plant growth, better quality and higher yields than any other 315W system on the market.

SUPPLIES LAST**

Lamp Sold Separately

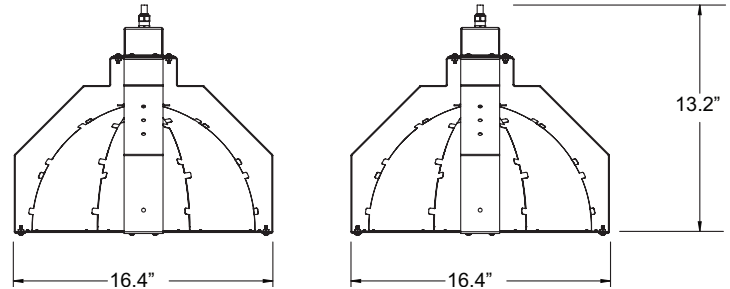

#### FEATURES

- The parabolic reflector outperforms square and rectangle reflectors
- The specular, micro-bend reflector dramatically outperforms hammertone reflectors
- Unique reflector design saves energy by increasing the performance of the 315W CMH lamp to the level of a 600W HPS lamp
- Compact, vertical design provides superior photometric uniformity for a level canopy
- Extremely lightweight allowing the reflector to be mounted at various angles and to be used for interlighting and supplemental applications
- Full-spectrum 315W CMH lamp with enhanced red spectral energy

#### SPECS

- Constructed of heavy-duty 22 gauge steel
- Standard with 15' cord and ballast plug
- 315W CMH
- One (1) pair of V-Hooks for mounting
- Five Year Warranty (Terms and Conditions Apply)

#### DIMENSIONS

Model	L	W	H
